

Touching Lives

Mr Lim was diagnosed with dementia when he was 84 years old, after his family noticed a change in his personality and struggled to care for him. He was not able to recognize his wife, 85 year old Mrs Lim, and would often shout at her. There were times when Mrs Lim felt so overwhelmed and frightened by his condition that she ran away from home when it became too stressful to care for him.

To make matters worse, Mr Lim's memory was locked in on the period when he suffered from colorectal cancer and had little control over his bowel movements. As a result of the emotional and physical stress, Mrs Lim, who had been healthy, began to suffer from depression and high blood pressure. Two years later, Mr Lim's family decided to admit him into Peacehaven Nursing Home so that he could receive professional care while his daughter, Angela continued to care for her mother and two children.

As Angela's husband was the sole bread winner in the family, there were times where the couple could not pay for her father's stay in Peacehaven. The Salvation Army worked out a plan to help them with the accumulated arrears so that Mr Lim could continue to receive quality care at Peacehaven.

Nursing Home**
Caring Holistically

Caring Holistically

With a capacity of 401 beds, Peacehaven Nursing Home provides compassionate, individualized, holistic care to all without discrimination. We offer a comprehensive gamut of services to care for the frail and elderly who have physical or mental disabilities requiring nursing care, and with no appropriate caregiver at home.

The Home has 13 separate Resident Living Areas (RLAs), each designed as an individual home-like environment. Hope RLA is specially designed to meet the needs of relatively independent residents with dementia. Residents in each RLA are provided with clinical, therapy, and pastoral care, on-site access to services from a general practitioner, dietician, geriatrician, speech therapist and pharmacist.

Located within the Home, Grace Corner, a collaboration with Changi General Hospital, is designed to model a comfortable home environment, providing rehabilitation services for clients with long term debilitating conditions. It is the first facility in Singapore that provides focused and lower-intensity rehabilitation

over 6 to 12 weeks to help clients regain maximum mobility and enable them to return home and live as independently as possible.

Peacehaven Nursing Home is a founding member of Eastern Health Alliance, the regional health system for the people of eastern Singapore which aims to provide seamless health care services. We have also been awarded the bizSAFE level 3 status which affirms our commitment to safety and health standards at the workplace.
